THE AUTHORS

WOLFGANG ACHTNER, professor of protestant theology and lecturer on philosophy at the Justus-Liebig-University Gießen, Germany. Two main research interests, firstly dialogue science – religion, for example issues of time, free will, evolutionary theories of religion, history of science; and secondly interreligious dialogue with regard to the nature of mystical experiences. Research interests in philosophy: philosophy of mathematics, philosophy of Ernst Cassirer.

TEUN KOETSIER is a historian and philosopher of mathematics at VU University Amsterdam. His subjects of interest are the history of the theory of machines, the relations between mathematics and religion in the course of history, and logical paradoxes.

STANISŁAW KRAJEWSKI, professor of philosophy in the Institute of Philosophy, University of Warsaw, has written books and papers on logic and the philosophy of mathematics as well as on the philosophy of dialogue and Jewish experiences in Poland and beyond. Involved in interreligious dialogue, he has been co-chairman of the Polish Council of Christians and Jews; he is also a co-author of the core exhibition in POLIN, the Museum of the History of Polish Jews in Warsaw.

ZBIGNIEW KRÓL works at the Department of the Philosophy of Science, Sociology and Foundations of Technology, Faculty of Administration and Social Sciences, Warsaw University of Technology, and at the two departments of the Institute of Philosophy and Sociology, Polish Academy of Sciences: the Department of Philosophy and Hermeneutics of Mathematics and the Department of Inquiries on Ancient Philosophy and the History of Ontology. His research concerns hermeneutics, the hermeneutical philosophy of mathematics and science, the history of mathematics and science, logic, mathematics, ontology and epistemology. He is the author of three mono-

**ROMAN MURAWSKI** is the head of the Chair of Mathematical Logic, Faculty of Mathematics and Computer Science, Adam Mickiewicz University in Poznan (Poland). His main subjects of interest are mathematical logic and the foundations of mathematics as well as the philosophy and history of logic and mathematics.

**JEAN-MICHEL SALANSKIS**, professor of Philosophy at Université Paris Ouest Nanterre La Défense, has been working in the fields of philosophy of mathematics, contemporary philosophy at large, and on Jewish tradition. He is the author of several books about all these topics. Among them: *Philosophie des mathématiques* (Paris, Vrin, 2008), *Talmud, science et philosophie* (Paris, Les Belles Lettres, 2004) and *Partages du sens* (Nanterre, Presses Universitaires de Paris Ouest, 2014).

**ANDREW SCHUMANN** is Associate Professor at the University of Information Technology and Management in Rzeszow, Poland. His research focuses on logic and philosophy of science with an emphasis on non-well-founded phenomena: self-references and circularity. He has contributed mainly to research areas such as reasoning under uncertainty, probability reasoning, non-Archimedean mathematics, as well as their applications to cognitive science. He is engaged also in unconventional computing, decision theory, logical modelling of the economy.

**VLADISLAV A. SHAPOSHNIKOV** is an associate professor, Faculty of Philosophy, Lomonosov Moscow State University, Russia. His research interests lie in the philosophy of mathematics and its history and in the relationship between science and religion.

**AARON THOMAS-BOLDUC** is a PhD candidate in philosophy at the University of Calgary under the supervision of Prof. Richard Zach, writing his dissertation on the Bad Company objection to neo-logicist programs in the philosophy of mathematics. His main research interests are in metaphysics, and the history and philosophy of mathematics and logic.

**KAZIMIERZ TRZĘSICKI** is the head of the Chair of Logic, Informatics and Philosophy of Science, University in Białystok. His main subjects of interest are logic and its application in informatics.
